Professional Summary

Computer Science and Engineering student specializing in Cybersecurity (2026) seeking a Software Developer role. Experienced in building full-stack web applications using React.js, Node.js, Express.js, SQL, and MongoDB, with hands-on expertise in integrating Generative AI APIs and prompt engineering workflows. Skilled in end-to-end software testing, debugging, and leveraging AI tools to optimize development cycles and software quality.

Technical Skills

Languages: C/C++, JavaScript (ES6+), SQL, HTML5, CSS3
Web & Cloud: React.js, Node.js, Express.js, MongoDB, Socket.IO, AWS (Fundamentals)
Generative AI & LLMs: Prompt Engineering, Prompt Optimization, Prompt Chaining, Few-shot/Zero-shot Prompting, Google Gemini API, OpenAI API
Developer Tools: Git, GitHub, Cursor AI, Antigravity AI, VS Code
Software Quality & Testing: End-to-End (E2E) Testing, Unit Testing, Bug Tracking, Debugging, Quality Assurance (QA)
Core Computer Science: Cyber Security, Computer Networks, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems

Work Experience

Binariad Technologies Pvt Ltd Bangalore, Karnataka
Software Developer Intern (Full Stack & AI Integration) May 2026 – August 2026

- Integrated Google Gemini APIs using structured prompt chaining and prompt optimization techniques to improve dynamic content generation and output consistency across test queries.
- Developed scalable full-stack web application features using React.js, Node.js, and MongoDB, utilizing AI-assisted developer tools (Cursor) to increase feature delivery speed by 25%.
- Spearheaded end-to-end software testing and quality assurance, systematically debugging frontend components and backend endpoints to resolve critical system bugs before deployment.

Projects

Secure-Health-Auth-App | *React.js, Node.js, MongoDB, Socket.IO, Vercel, Render* July 2025 – October 2025

- Engineered an adaptive multi-factor authentication (MFA) system leveraging device trust scoring and behavioral biometrics to mitigate unauthorized access.
- Integrated Have I Been Pwned API for real-time password breach detection and proactive security auditing.
- Implemented Role-Based Access Control (RBAC) to enforce least-privilege security policies across system endpoints.
- Architected a real-time security dashboard using Socket.IO to monitor user sessions and flag operational anomalies.

LeetCode Whisper | *JavaScript, Gemini API, Chrome Extension* April 2025 – June 2025

- Architected a Chrome Extension (Manifest V3) powered by Google Gemini API to deliver instant algorithmic hints and problem-solving guidance.
- Designed a responsive JavaScript front-end featuring a modal popup chat interface for real-time interaction.
- Implemented automated AI code review features, analyzing time and space complexity to provide personalized feedback.

Code-Sync-Arena | *React.js, Node.js, Socket.IO, MySQL, Vercel, Render* May 2026 – May 2026

- Architected a real-time collaborative whiteboard platform enabling multi-user canvas synchronization with low-latency WebSocket events using Socket.IO.
- Engineered relational database schemas in MySQL to handle user room states, session management, and persistent canvas drawings.
- Optimized React.js HTML5 Canvas rendering performance to support fluid concurrent drawing across multiple active users.

Education

RNS Institute of Technology Bengaluru, Karnataka
B.E. in Computer Science & Engineering (Cyber Security) – CGPA: 8.42/10 2022 – 2026

Certifications & Activities

Generative AI and Prompt Engineering For Absolute Beginners – Udemy July 2026

- Completed 22.5 hours covering Generative AI fundamentals and applied prompt engineering.

Networking Basics – Cisco Networking Academy March 2025

- Mastered core networking protocols including OSI, TCP/IP, Subnetting, TCP, UDP, HTTP, and FTP.

Nokia Accelerate – Her Hackathon March 2025

- Collaborated in a 24-hour sprint to build and present a functional coding solution under tight deadlines.
