Bengaluru, Karnataka, India

Professional Summary

Computer Science and Engineering student specializing in Cybersecurity (2026) with hands-on experience building full-stack web applications and Generative AI systems. Experienced in React.js, Node.js, REST APIs, SQL, MongoDB, RAG pipelines, prompt engineering, and LLM APIs. Skilled in software testing, debugging, Git/GitHub, CI/CD, and deploying production-ready solutions from design through deployment.

Technical Skills

Languages: C/C++, JavaScript (ES6+), SQL
Frontend: React.js, HTML5, CSS3, Web Development
Backend: Node.js, Express.js, REST APIs, Socket.IO
Databases: SQL, MongoDB
AI/ML & Generative AI: RAG, Prompt Engineering, Prompt Optimization, Prompt Chaining, Gemini API, OpenAI API
Cloud & DevOps: Git, GitHub, Docker, Vercel, Render, AWS (Fundamentals)
Testing & Quality: Unit Testing, End-to-End Testing, API Testing, Debugging, QA, RCA, Application Troubleshooting
Core Computer Science: Computer Networks, Cybersecurity, Data Structures & Algorithms, OOP, Operating Systems

Work Experience

Binariad Technologies Pvt Ltd

Bangalore, Karnataka

Software Developer Intern (Full Stack & AI Integration)

May 2026 – September 2026

- Developed and enhanced full-stack web application features using React.js, Node.js, Express.js, MongoDB, and REST APIs, translating functional requirements into production-ready functionality.
- Integrated third-party and AI APIs, including Google Gemini, to implement automated workflows, dynamic content generation, and AI-powered application features.
- Performed functional, API, and end-to-end testing while debugging and resolving frontend, backend, integration, and UI issues to improve application reliability.
- Implemented and refined application features across the development lifecycle, from requirements analysis and API integration to testing, debugging, and deployment support.

Projects

AgentShield: AI Agent Security Evaluation Platform

March 2026 – April 2026

Python, FastAPI, LangGraph, Docker, React

- Built a security evaluation platform to test AI agents across baseline, gateway, sandbox, and combined configurations.
- Implemented an AST-based security gateway to identify and block potentially dangerous code before execution.
- Built a Docker-based sandbox with network isolation, restricted permissions, and resource limits for safe code execution.
- Developed an evaluation engine and React dashboard to track attack outcomes, security metrics, and experiment results.

Veritas-Rag: AI Research Intelligence Platform

January 2026 – February 2026

Python, FastAPI, ChromaDB, Gemini API, BM25

- Architected an evidence-first RAG platform using FastAPI and React, supporting document and web URL ingestion.
- Engineered a hybrid retrieval pipeline combining dense vector search (ChromaDB) and sparse retrieval (BM25) with RRF.
- Implemented Cross-Encoder reranking and built a benchmark evaluation framework using Recall@5, Precision@5, and MRR.
- Secured web URL ingestion with SSRF protection, URL validation, duplicate detection, and source metadata handling.

Secure-Health-Auth-App

September 2025 – October 2025

React.js, Node.js, MongoDB, Socket.IO, Vercel, Render

- Engineered an adaptive multi-factor authentication (MFA) system leveraging device trust scoring and behavioral biometrics.
- Integrated Have I Been Pwned API for real-time password breach detection and proactive security auditing.
- Implemented Role-Based Access Control (RBAC) to enforce least-privilege security policies across system endpoints.
- Architected a real-time security dashboard using Socket.IO to monitor user sessions and flag operational anomalies.

Education

RNS Institute of Technology

Bengaluru, Karnataka

B.E. in Computer Science & Engineering (Cyber Security) – CGPA: 8.42/10

2022 – 2026

Certifications & Activities

Generative AI and Prompt Engineering For Absolute Beginners – Udemy

July 2026

Completed 22.5 hours covering Generative AI fundamentals, LLM workflows, and prompt engineering.

Networking Basics – Cisco Networking Academy

March 2025

Mastered core networking protocols: OSI, TCP/IP, Subnetting, TCP, UDP, HTTP, and FTP.

Nokia Accelerate – Her Hackathon

March 2025

Collaborated in a 24-hour sprint to build and present a functional prototype under strict time limits.
